Supporting letter

of the Hungarian Society of Nuclear Medicine „Hevesy György”

The Hungarian Society of Nuclear Medicine „Hevesy György” is supporting the planned Clinical PET-CT Training Programme of the ScanoMed, a Hungarian medical imaging service provider company.

The three training moduls are well structured.

The programme and curriculum seem to be appropriate.

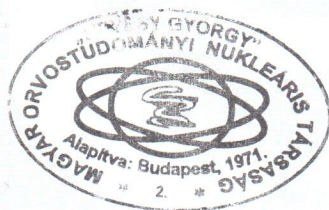

The educational infrastructure is excellent.

Performing more than 2500 clinical PET-CT examination in a year, and having a medical cyclotron the team has sufficient knowledge, skills and experience in practical PET-CT.

Quality of teaching is guaranteed by the long-standing continuous cooperation with the Dept. of Nuclear Medicine at the Debrecen University.

Implementation of the Programme should be monitored in the future.

Pécs, February 7, 2012.

Dr. Zámbó Katalin

Prof. Katalin Zámbó

President of the Hungarian Society

of Nuclear Medicine
